

TABLE OF CONTENTS

| | <u>Page</u> |
|--|-------------|
| LIST OF ACRONYMS AND ABBREVIATIONS | |
| GLOSSARY | |
| EXECUTIVE SUMMARY | ES-1 |
| CHAPTER 1. INTRODUCTION | 1-1 |
| 1.1 Why did EPA Decide to Conduct This Study? | 1-1 |
| 1.2 What is Hydraulic Fracturing? | 1-2 |
| 1.3 How does EPA Protect Underground Sources of Drinking Water? | 1-3 |
| 1.4 How Could Hydraulic Fracturing of Coalbed Methane Wells Potentially Impact A USDW? | 1-5 |
| 1.5 How is EPA Conducting Its Study? | 1-5 |
| 1.6 How has EPA Involved Stakeholders? | 1-6 |
| 1.7 What Information Will I Find in This Report? | 1-6 |
| CHAPTER 2. STUDY METHODOLOGY | 2-1 |
| 2.1 Overview of the Study Methods | 2-1 |
| 2.2 Information Sources | 2-2 |
| 2.2.1 Literature Reviews | 2-2 |
| 2.2.2 Department of Energy | 2-3 |
| 2.2.3 Interviews | 2-4 |
| 2.2.4 Field Visits | 2-4 |
| 2.2.5 Federal Register Notice to Identify Reported Incidents | 2-5 |
| 2.3 Review Process | 2-6 |
| CHAPTER 3. CHARACTERISTICS OF COALBED METHANE PRODUCTION AND ASSOCIATED HYDRAULIC FRACTURING PRACTICES | 3-1 |
| 3.1 Introduction | 3-1 |
| 3.2 Hydraulic Fracturing | 3-3 |
| 3.3 Fracturing Fluids | 3-7 |
| 3.4 Predicting, Monitoring and Measuring Fracture Height | 3-10 |
| 3.4.1 Modeling | 3-11 |
| 3.4.2 Fracture Diagnostics | 3-12 |
| 3.4.3 Consistency of Fracture Behavior | 3-15 |
| 3.5 Summary | 3-17 |
| CHAPTER 4. HYDRAULIC FRACTURING FLUIDS | 4-1 |
| 4.1 Introduction | 4-1 |
| 4.2 Chemical Constituents in Fracturing Fluids | 4-2 |
| 4.3 History of Fracturing Fluids | 4-7 |
| 4.4 Types of Fluids | 4-8 |

| | | |
|------------|---|------|
| 4.4.1 | Gelled Fluids | 4-8 |
| 4.4.2 | Foamed Gels | 4-10 |
| 4.4.3 | Water & Potassium Chloride Water Treatments | 4-11 |
| 4.4.4 | Acids | 4-11 |
| 4.4.5 | Combination Treatments | 4-12 |
| 4.4.6 | Fluid Additives | 4-12 |
| 4.4.7 | Proppants | 4-15 |
| 4.5 | Summary | 4-15 |
| CHAPTER 5. | SUMMARY OF COALBED METHANE BASIN DESCRIPTIONS | 5-1 |
| 5.1 | The San Juan Basin | 5-1 |
| 5.2 | The Black Warrior Basin | 5-2 |
| 5.3 | The Piceance Basin | 5-3 |
| 5.4 | The Uinta Basin | 5-4 |
| 5.5 | The Powder River Basin | 5-5 |
| 5.6 | The Central Appalachian Basin | 5-6 |
| 5.7 | The Northern Appalachian Basin | 5-7 |
| 5.8 | The Western Interior Coal Region | 5-8 |
| 5.9 | The Raton Basin | 5-11 |
| 5.10 | The Sand Wash Basin | 5-12 |
| 5.11 | The Washington Coal Basin | 5-13 |
| 5.12 | Summary | 5-14 |
| CHAPTER 6. | WATER QUALITY INCIDENTS | 6-1 |
| 6.1 | San Juan Basin (Colorado and New Mexico) | 6-2 |
| 6.1.1 | Summary of Reported Incidents | 6-2 |
| 6.1.2 | State Agency Follow-Up (Colorado Oil and Gas Cons. Comm.) | 6-4 |
| 6.2 | Powder River Basin (Wyoming and Montana) | 6-13 |
| 6.2.1 | Summary of Reported Incidents | 6-13 |
| 6.3 | Black Warrior Basin (Alabama) | 6-14 |
| 6.3.1 | Summary of Reported Incidents | 6-14 |
| 6.3.2 | State Agency Follow-Up (Alabama Oil and Gas Board) | 6-16 |
| 6.4 | Central Appalachian Basin (Virginia and West Virginia) | 6-16 |
| 6.4.1 | Summary of Virginia Incidents | 6-17 |
| 6.4.2 | State Agency Follow-Up (Virginia DMME) | 6-18 |
| 6.5 | Conclusion | 6-19 |
| CHAPTER 7. | CONCLUSIONS AND RECOMMENDATIONS | 7-1 |
| 7.1 | Reported Water Quality Incidents | 7-1 |
| 7.2 | Fluid Injection Directly into USDWs (Mechanism 1) | 7-2 |
| 7.3 | Breach of Confining Layer (Mechanism 2) | 7-4 |
| 7.4 | Recommendations | 7-5 |

APPENDIX B: Quality Assurance Plan

LIST OF TABLES

EXECUTIVE SUMMARY

| | | |
|------|--|-------|
| ES-1 | U.S. Coal Basins Production Statistics and Activity Information | ES-2 |
| ES-2 | Summary of MSDSs for Hydraulic Fracturing Fluid Additives | ES-12 |
| ES-3 | Estimated Concentrations at the Point of Injection of Constituents of Concern in Hydraulic Fracturing Fluids | ES-13 |
| ES-4 | Evidence in Support Of Coal-USDW Co-Location in U.S. Coal Basins | ES-14 |
| ES-5 | Summary of Reported Incidents that Associate Water Quality/Quantity with Coalbed Methane (CBM) Activity | ES-16 |

CHAPTER 3

| | | |
|-----|---|------|
| 3-1 | Limitations Of Fracture Diagnostic Techniques | 3-15 |
|-----|---|------|

CHAPTER 4

| | | |
|-----|--|-----|
| 4-1 | Summary of MSDSs for Hydraulic Fracturing Fluid Additives | 4-5 |
| 4-2 | Estimated Concentrations at the Point of Injection of Constituents of Concern in Hydraulic Fracturing Fluids | 4-6 |
| 4-3 | Summary of Hydraulic Fracturing Fluids and Additives from BLM Lists | 4-7 |

CHAPTER 5

| | | |
|-----|--|------|
| 5-1 | Evidence in Support Of Coal–USDW Co-Location in U.S. Coal Basins | 5-15 |
|-----|--|------|

CHAPTER 6

| | | |
|-----|---|------|
| 6-1 | Summary of Alleged Water Quality/Quantity Incidents | 6-20 |
|-----|---|------|

LIST OF FIGURES

EXECUTIVE SUMMARY

| | | |
|------|---|-------|
| ES-1 | Locus Map of Major U.S. Coal Basins | ES-3 |
| ES-2 | A Graphical Representation of the Hydraulic Fracturing Process in Coalbed Methane Wells | ES-4 |
| ES-3 | Mechanism #1 – Direct Fluid Injection into a USDW (Coal within USDW) | ES-6 |
| ES-4 | Mechanism #2 – Fracture Creates Connection to USDW | ES-8 |
| ES-5 | The fracturing fluids are stored on site in large, upright storage tanks in truck-mounted tanks | ES-10 |
| ES-6 | The fracturing fluids, additives, and proppant are pumped from the storage tanks to a manifold system placed on the wellhead where they are mixed just prior to injection | ES-11 |

CHAPTER 1

| | | |
|-----|-------------------------------------|-----|
| 1-1 | Locus Map of Major U.S. Coal Basins | 1-8 |
|-----|-------------------------------------|-----|

| | | |
|-----|--|------|
| 1-2 | Mechanism #1-Direct Fluid Injection into A USDW (Coal within USDW) | 1-9 |
| 1-3 | Mechanism #2-Fracture Creates Connection to USDW | 1-10 |

CHAPTER 3

| | | |
|-----|---|------|
| 3-1 | Locus Map of Major U.S. Coal Basins | 3-19 |
| 3-2 | Geography of an Ancient Peat-Forming System | 3-20 |
| 3-3 | Schematic Representation of “Face Cleat” and “Butt Cleat” | 3-21 |
| 3-4 | Water and Gas Production Over Time | 3-22 |
| 3-5 | A Graphical Representation of the Hydraulic Fracturing Process in Coalbed Methane Wells | 3-23 |
| 3-6 | Side-View of a Vertical Hydraulic Fracture Typical of Coalbeds | 3-24 |
| 3-7 | Plan View of a Vertical, Two-Winged Coalbed Methane Fracture Showing the Reservoir Region Invaded by Fracturing Fluid Leakoff | 3-25 |
| 3-8 | Plan View (Looking Down the Wellbore) of a Vertical Hydraulic Fracture | 3-26 |

CHAPTER 4

| | | |
|-------------|--|------|
| 4-1 to 4-11 | Photos from a Hydraulic Fracturing Field Visit | 4-17 |
|-------------|--|------|

CHAPTER 5

| | | |
|-----|-------------------------------------|------|
| 5-1 | Locus Map of Major U.S. Coal Basins | 5-17 |
|-----|-------------------------------------|------|

LIST OF ATTACHMENTS

| | | |
|---------------------------------------|---|------|
| ATTACHMENT 1. THE SAN JUAN BASIN | | A1-1 |
| 1.1 | Basin Geology | A1-1 |
| 1.2 | Basin Hydrology and USDW Identification | A1-2 |
| 1.3 | Coalbed Methane Production Activity | A1-5 |
| 1.4 | Summary | A1-8 |
| ATTACHMENT 2. THE BLACK WARRIOR BASIN | | A2-1 |
| 2.1 | Basin Geology | A2-1 |
| 2.2 | Basin Hydrology and USDW Identification | A2-1 |
| 2.3 | Coalbed Methane Production Activity | A2-2 |
| 2.4 | Summary | A2-6 |
| ATTACHMENT 3. THE PICEANCE BASIN | | A3-1 |
| 3.1 | Basin Geology | A3-1 |
| 3.2 | Basin Hydrology and USDW Identification | A3-2 |
| 3.3 | Coalbed Methane Production Activity | A3-4 |
| 3.4 | Summary | A3-5 |
| ATTACHMENT 4. THE UINTA COAL BASIN | | A4-1 |
| 4.1 | Basin Geology | A4-1 |
| 4.2 | Basin Hydrology and USDW Identification | A4-2 |
| 4.3 | Coalbed Methane Production Activity | A4-3 |

| | | |
|---|--|-------|
| 4.4 | Summary | A4-4 |
| ATTACHMENT 5. THE POWDER RIVER COAL BASIN | | A5-1 |
| 5.1 | Basin Geology | A5-1 |
| 5.2 | Basin Hydrology and USDW Identification | A5-3 |
| 5.3 | Coalbed Methane Production Activity | A5-5 |
| 5.4 | Summary | A5-8 |
| ATTACHMENT 6. THE CENTRAL APPALACHIAN COAL BASIN | | A6-1 |
| 6.1 | Basin Geology | A6-1 |
| 6.2 | Basin Hydrology and USDW Identification | A6-3 |
| 6.3 | Coalbed Methane Production Activity | A6-6 |
| 6.4 | Summary | A6-7 |
| ATTACHMENT 7. THE NORTHERN APPALACHIAN COAL BASIN | | A7-1 |
| 7.1 | Basin Geology | A7-1 |
| 7.2 | Basin Hydrology and USDW Identification | A7-2 |
| 7.3 | Coalbed Methane Production Activity | A7-5 |
| 7.4 | Summary | A7-6 |
| ATTACHMENT 8. THE WESTERN INTERIOR BASIN | | A8-1 |
| 8.1 | Basin Coals | A8-1 |
| 8.1.1 | Arkoma Basin Coals | A8-2 |
| 8.1.2 | Cherokee Basin Coals | A8-2 |
| 8.1.3 | Forest City Basin Coals | A8-2 |
| 8.2 | Basin Hydrology and USDW Identification | A8-2 |
| 8.2.1 | Arkoma Basin Hydrology and USDW Identification | A8-2 |
| 8.2.2 | Cherokee Basin Hydrology and USDW Identification | A8-4 |
| 8.2.3 | Forest City Basin USDW Identification | A8-6 |
| 8.3 | Coalbed Methane Production Activity | A8-9 |
| 8.3.1 | Arkoma Basin Production Activity | A8-9 |
| 8.3.2 | Cherokee Basin Production Activity | A8-10 |
| 8.3.3 | Forest City Basin Production Activity | A8-10 |
| 8.4 | Summary | A8-11 |
| ATTACHMENT 9. THE RATON BASIN | | A9-1 |
| 9.1 | Basin Geology | A9-1 |
| 9.2 | Basin Hydrology and USDW Identification | A9-2 |
| 9.3 | Coalbed Methane Production Activity | A9-3 |
| 9.4 | Summary | A9-5 |
| ATTACHMENT 10. THE SAND WASH COAL BASIN | | A10-1 |
| 10.1 | Basin Geology | A10-1 |
| 10.2 | Basin Hydrology and USDW Identification | A10-2 |
| 10.3 | Coalbed Methane Production Activity | A10-3 |
| 10.4 | Summary | A10-4 |

| | |
|---|-------|
| ATTACHMENT 11. THE PACIFIC AND CENTRAL COAL REGIONS | A11-1 |
| 11.1 Basin Geology | A11-1 |
| 11.1.1 Pacific Coal Region Geology | A11-2 |
| 11.1.2 Central Coal Region Geology | A11-4 |
| 11.2 Basin Hydrology and USDW Identification | A11-4 |
| 11.3 Coalbed Methane Production Activity | A11-5 |
| 11.3.1 Pacific Coal Region Activity | A11-5 |
| 11.3.2 Central Coal Region Activity | A11-5 |
| 11.4 Summary | A11-6 |

LIST OF TABLES

ATTACHMENT 1

| | |
|---|-------|
| A1-1 Chemical Components of Typical Fracture/Stimulation Fluids Used for San Juan Coalbed Methane Wells | A1-10 |
|---|-------|

ATTACHMENT 2

| | |
|---|------|
| A2-1 Chemical Components Previously Used in Typical Fracturing/Stimulation Fluids for Alabama Coalbed Methane Wells | A2-7 |
|---|------|

ATTACHMENT 5

| | |
|---|------|
| A5-1 Average Water Quality Results from Produced Waters | A5-7 |
|---|------|

ATTACHMENT 6

| | |
|---|------|
| A6-1 Relative Locations of USDWs and Methane-Bearing Coalbeds | A6-5 |
|---|------|

ATTACHMENT 7

| | |
|---|------|
| A7-1 Relative Locations of USDWs and Methane-Bearing Coalbeds | A7-4 |
|---|------|

ATTACHMENT 8

| | |
|--|------|
| A8-1 Relative Locations of USDWs and Potential Methane-Bearing Coalbeds, Arkoma Basin | A8-4 |
| A8-2 Relative Locations of USDWs and Potential Methane-Bearing Coalbeds, Cherokee Basin | A8-6 |
| A8-3 Relative Locations of USDWs and Potential Methane-Bearing Coalbeds, Forest City Basin | A8-8 |

LIST OF FIGURES

ATTACHMENT 1

| |
|---|
| A1-1 Regional Tectonic Setting of the San Juan Basin |
| A1-2 Generalized Hydrogeologic Cross-Section of the San Juan Basin |
| A1-3 Isopach Map of the Fruitland Formation Including Pictured Cliffs Tongues |

- A1-4 Cross Section S-10 from Figure A1-3, a Stratigraphic Strike Section
- A1-5 Cross Section D-20 from Figure A1-3, a Stratigraphic Dip Section from the *Fruitland* to the Ojo Alamo
- A1-6 Cross Section E-W from Figure A1-3, a Stratigraphic Strike Section from the Southeastern San Juan Basin, Showing the Erosional Fruitland-Ojo Alamo Contact
- A1-7 Areas of the San Juan Basin that Exhibit Similar Characteristics for Production, Coal Properties, and Hydrologic Pressure
- A1-8 Map of the Potentiometric Surface of the Fruitland Aquifer
- A1-9 General Ground Water Flow in the Fruitland/Pictured Cliffs Aquifer System, San Juan Basin
- A1-10 Generalized Flow Paths of the Fruitland/Pictured Cliffs Aquifer System, San Juan Basin
- A1-11 Equipotentials and Flow Paths from Ground Water Flow Modeling of the San Juan Basin
- A1-12 Chloride Concentration Map (mg/L) of Waters of the Fruitland Aquifer, San Juan Basin
- A1-13 Histograms of Water Analyses (mg/L) from the Fruitland/Pictured Cliffs Aquifer System in the North Central and South-Margin Areas of the San Juan Basin
- A1-14 Direction of Ground Water Flow and Dissolved Solids Concentration in Tertiary Rocks
- A1-15 Outline of the Fairway Zone of Area 1 of the San Juan Basin
- A1-16 Conceptual Schematic (Plan View) of Tensile Fracture and Shear Failure in Coal Formed by Openhole Cavitation Cycling
- A1-17 Table of Fracture Stimulation Treatments in the *Fruitland* Formation of the San Juan Basin
- A1-18 Density of Wells in the Northern Portion of Area 1 in the San Juan Basin, as of 12/31/1990
- A1-19 Fruitland Net Coal Map
- A1-20 Plan View of a Vertical, Two-Winged Coalbed Methane Fracture Showing the Reservoir Region Invaded by Fracturing Fluid Leakoff

ATTACHMENT 2

- A2-1 Coalbed Methane Fields of Alabama
- A2-2 Coal Cycles of the Pottsville Formation in the Black Warrior Basin
- A2-3 Cross-Section of the Pottsville Formation in the Deerlick Creek Field
- A2-4 Hydrogeologic Cross-Section of the Pottsville Formation in the Brookwood Field
- A2-5 TDS Concentration of Pottsville Aquifer, Black Warrior Basin, Alabama
- A2-6 TDS Concentration of the Mary Lee Coal Seam of the Pottsville Aquifer in the Eastern Part of the Black Warrior Basin, Alabama
- A2-7 Generalized Increase in TDS Concentration with Depth in the Pottsville Aquifer, Black Warrior Basin, Alabama
- A2-8 "Stiff" Diagram of Water Salinity
- A2-9 Relationship of Water Salinity to Structural Features in the Oak Grove Field, Black Warrior Basin, Alabama
- A2-10 Productive Coal Seams and the Typical Number of Stimulations Per Well as of 1993, Black Warrior Basin, Alabama
- A2-11 Sketch of a Vertical, Unconfined Fracture Typical of the Black Warrior Basin

ATTACHMENT 3

- A3-1 Tectonic Map of the Piceance Basin
- A3-2 Stratigraphic Section of the Piceance Basin
- A3-3 Generalized Depth to Base of Coal-Cameo Group
- A3-4 Locations of Gas Fields
- A3-5 Exploration Target Areas, Piceance Basin
- A3-6 Diagrammatic East-West Sections of Hydrologic System
- A3-7 Dominant Chemical Constituents in the Two Major Bedrock Aquifers

ATTACHMENT 4

- A4-1 Index Map of Coal Fields in Uinta Basin, Utah
- A4-2 Stratigraphic Column for the Cretaceous of the Castle Valley
- A4-3 Coalbed Methane Development in Carbon County, Utah
- A4-4 Cross Section of Cretaceous Rocks

ATTACHMENT 5

- A5-1 Location of the Powder River Basin of Wyoming and Montana
- A5-2 Map of the Development of Coalbed Methane in the Powder River Basin
- A5-3 Conceptual Cross Section of the Powder River Basin (West-East)
- A5-4 Stratigraphic Diagram of Geology in the Powder River Basin
- A5-5 Detailed Cross Section of the Wasatch and Fort Union Formations in the Powder River Basin
- A5-6 Conceptual Cross Section (West-East) of the Fort Union Formation in the Eastern Powder River Basin Near Gillette, Wyoming
- A5-7 Conceptual Cross Section Near the Center of Powder River Basin
- A5-8 Conceptual Cross Section in the Western Powder River Basin near Lake DeSmet
- A5-9 Graph of Coalbed Methane Production and Wells in Service in the Powder River Basin, 1989 to 1999

ATTACHMENT 6

- A6-1 Area of Highest Methane Concentration
- A6-2 Structural Features
- A6-3 Representative Stratigraphic Column of Pennsylvanian Age Formations
- A6-4 Isopach Map: Thickness of Cover over the Pocahontas No. 3 Coalbed
- A6-5 Isopach Map: Thickness of Cover over the Pocahontas No. 4 Coalbed
- A6-6 Isopach Map: Thickness of Cover Over the Fire Creek – Lower Horsepen Coalbed
- A6-7 Isopach Map: Thickness of Cover Over Beckley – War Creek Coalbed
- A6-8 Isopach Map: Thickness of Cover Over the Sewell/Lower Seaboard Coalbed
- A6-9 Isopach Map: Thickness of Cover Over the Leager/Jawbone Coalbed
- A6-10 Stratigraphic Cross Section of the Coalbeds in the Southwest Virginia Field

ATTACHMENT 7

- A7-1 Index Map Showing County Names
- A7-2 Structure Map
- A7-3 Generalized Stratigraphic Column of the Northern Appalachian Coal Basin
- A7-4 Isopach Map: Depth of Cover to the Brookville/Clarion Group Coals
- A7-5 Isopach Map: Depth of Cover to the Kittanning Group Coals
- A7-6 Isopach Map: Depth of Cover to the Freeport Group Coals

- A7-7 Isopach Map: Depth of Cover to the Pittsburgh Group Coals
- A7-8 Isopach Map: Depth of Cover to the Sewickley Group Coals
- A7-9 Isopach Map: Depth of Cover to the Waynesburg Group Coals

ATTACHMENT 8

- A8-1 Western Interior Coal Basin – Index Map of the Arkoma, Cherokee and Forest City Basins
- A8-2 Western Interior Coal Basin – Generalized Stratigraphic Column of the Pennsylvanian System In the Arkoma Basin
- A8-3 Western Interior Coal Basin – Stratigraphic Column of the Cherokee Group In the Cherokee Basin
- A8-4 Western Interior Coal Basin – Forest City Basin Study Area
- A8-5 Counties, Aquifer, and Physiographic Provinces of Arkansas
- A8-6 Counties, Aquifer, and Physiographic Provinces of Oklahoma
- A8-7 Counties, Aquifer, and Physiographic Provinces of Kansas
- A8-8 Counties, Aquifer, and Physiographic Provinces of Missouri
- A8-9 Western Interior – Detail of Forest City Basin with Detail of Cherokee Basin in Missouri
- A8-10 Water Quality (TDS) of Lower Paleozoic Aquifers in Kansas
- A8-11 Counties, Aquifers, and Physiographic Provinces of Iowa
- A8-12 Western Interior Coal Basin – Quality of Ground Water in the Paleozoic Aquifers of Missouri
- A8-13 Counties, Aquifers, and Physiographic Provinces of Nebraska

ATTACHMENT 9

- A9-1 Structure Contour Map on Top Trinidad Sandstone
- A9-2 Structural Cross Section
- A9-3 Generalized Stratigraphy of Cenozoic and Mesozoic Units
- A9-4 Vermejo Formation – Total Coal Isopach
- A9-5 Overburden to Coal Interval
- A9-6 Location of Stratigraphic Cross Sections
- A9-7 Cross Section A-A'
- A9-8 Cross Section C-C'
- A9-9 Potentiometric Surface Map for Raton Basin
- A9-10 Relationship Between Gas Content and Depth Below Potentiometric Surface for Two Groups of Coal Rank
- A9-11 Historical Gas and Water Production for Typical Well Showing How Water Withdrawal Decreases and Methane Production Increases
- A9-12 Historical Gas and Water Production for Ozzello 42-1 Well Showing Water Withdrawal Increasing with Gas Production

ATTACHMENT 10

- A10-1 Location of the Sand Wash Basin of Colorado and Wyoming
- A10-2 Diagram of Geologic Formations within the Sand Wash Basin and Neighboring Basins

- A10-3a Map of Coal and Geologic Features Within the Sand Wash Basin
- A10-3b Conceptual Cross Section C-C'
- A10-4 Location of the Sand Wash Basin in Relation to the Western Seaway of Upper Cretaceous Times
- A10-5 Ground Water Quality Trends in the Sand Wash Basin
- A10-6 Comparison of Features Relevant to Coalbed Methane Production – San Juan Basin and Sand Wash Basin

ATTACHMENT 11

- A11-1 The Pacific Coal Region Showing Targeted Subbasins Used for Coalbed Methane Estimates
- A11-2 The Central Coal Region
- A11-3 Major Coal-Bearing Areas in Western Washington
- A11-4 Stratigraphy for Three Coal Districts of the Pacific Coal Region
- A11-5 Structural Map of the Central Columbia Basin and Yakima Fold Belt
